NEC

NEC Business Phones

Multi-function desktop phones and wireless handsets

Phones that deliver the effective communications you need

Align your communications with business growth

To stay relevant, traditional desktop phones must integrate with the demands of the modern workforce and evolve to meet our ever-changing needs.

They must provide deployment flexibility to support a wide range of applications and improve employee performance with the ability for customisation of desktop and mobile functionality.

NEC business phones allow you to choose from a wide range that will suit your needs. Whether it's pure IP, or a combination of IP and digital - our phones will perform for your business.

COMPLETE FLEXIBILITY

WORKPLACE MOBILITY

Despite the increased reliance on mobile devices, desktop telephones remain at the hub of business communications.

Freedom of movement with DECT handsets

Our DECT handsets give your employees flexible and secure communications. Providing most of the features and functionality of a desktop phone plus the handsets include mobile enhancements such as text messaging, alarming, programmable keys and integration with third party applications.

GET CUSTOMER-CENTRIC

NEC's desktop telephones and applications provide your business with communications tools for a premier multimedia user experience.

Personal, system & corporate directories - Quick user access to easily reach the people they need.

Superb audio - Sound design is an art form at NEC, we utilise some of the world's most advanced voice quality engineering tools.

XML open interface support on IP telephones - Provides a platform for your developers to create applications specifically for your business and enables integration with common productivity tools.

Advanced applications - Enable your staff to work more efficiently and with greater mobility to help improve customer service.

On-site wireless communications

Today's business environment demands flexible ways of working and excellent customer service. Your organisation may be seeking to extend the reach of their converged voice and data network and integrate wireless communications without compromising on voice quality, availability and security. NEC's Business Mobility IP DECT realises all of this, and much more.

Powerful business mobility handsets

All our DECT handsets offer excellent voice communication with crystal clear speech, loudspeaker and hands-free support, seamless handover and roaming, high security with DECT authentication, and seamless integration with NEC communication servers. Applications include central directory, presence, text and alarm messaging and location detection.

For voice, text messaging and in-house mobility

These handsets give your employees flexible, easy and secure communications as they roam about your company's premises, while providing most of the features and functionality of a desktop phone. Mobile enhancements include: text messaging, alarming, programmable keys, and integration with third-party applications.

ULTIMATE
DEVICES

WIDE RANGE

IP DECT provides key applications
and ensures best user experience

IP and DECT technologies

Since its standardisation, DECT has developed into the most successful technology for wireless on-premises communications. Over the years many innovations have been introduced, and NEC has been at the forefront of all of these.

Today, IP DECT plays an important role in connecting and integrating devices, applications and data. It allows you to dynamically design, manage and streamline meaningful work-flows across an organisation.

**FUTURE
THINKING**

**DECT
INTEROPERABILITY**

IP DECT works on many other platforms

NEC IP DECT is an open system that can potentially interconnect with platforms from any vendor that supports the SIP protocol. NEC has many IP DECT customers with third-party host platforms including Avaya, Cisco, Broadsoft, Alcatel-Lucent and Mitel.

G277 - IP handset

Feature rich office mobility

The DECT handset G277 is an entry level professional mobile handset with mobile unified communication features, plug-and-play, charger compatibility and more for effective operation in various businesses.

-  Call control features seamlessly integrate with your PBX.
-  Includes unified communications features such as central directory access.
-  Wired headset and built-in trembler for flexibility and comfort.
-  DECT compliance for high-quality speech and security.
-  High-definition audio.
-  Dual chargers and rack chargers; also charging additional batteries.
