

Email and Collaboration Security POC

Check Point Harmony

“74% of all data breaches involves some form of human interaction, and up to 91% of targeted cyber-attacks starts with email.” - ADAPT

Overview

As digital communication and collaboration tools proliferate, the risk of security breaches continues to escalate. With email, collaboration platforms, and a variety of devices such as tablets, phones, and kiosks becoming integral to business operations, the attack surface is expanding at a rapid rate.

Your employees are at the heart of your organisation, driving value and ensuring its success. Safeguarding them from cyber threats is essential, allowing them to focus on what matters most: your core business.

Partnership

NEC and Check Point understand the security vendor landscape is complex and overwhelming, with seemingly hundreds of best of breed tools, teams are suffering from control panel fatigue.

Check Point’s unified approach to security tooling means you can rapidly assess value and suitability, add or remove services depending on your business needs.

NEC’s security experts will work with you to deploy a POC and help you realise the benefits with no disruption, guaranteed improved protection, and enhanced end-user experience.

Benefits

- Up to 93x more effective than cloud native email security
- Up to 44x more effective than email gateways Can be deployed to enhance and work with native security tools
- Powered by AI and ML for continuous learning and pro-active pattern identification
- Installs in 7 clicks, deployed in 5 mins
- Protect your emails and collaboration applications Protect against Business Email Compromise by scanning inbound, internal, and outbound emails Prevent, detect, and remediate with our in-line API protection
- Unified quarantine with Microsoft Defender.

Outcomes

- Free 14-day POC trial
- Complete solution to trial - monitor only mode
- Comprehensive report showing catch rate differences
- Instant POC to production license transition Consumption-based M2M billing model (tied to M365 licenses).
