

Secure Access Service Edge (SASE)

Secure and reliable access to your corporate network and enterprise applications at any time, from any place.

Network and security technologies are converging and moving to a cloud-based model. This convergence of networking and security at the network edge, such as branch and remote offices, is called Secure Access Service Edge or SASE.

NEC's SASE service combines comprehensive network capabilities with network-related security functions to support the dynamic secure access needs of the modern geographically dispersed workforce.

NEC can combine on-premises and cloud-based services to deliver a broad range of network and security functionality, allowing you to choose from options including SD-WAN, Firewall, Secure Web Gateway, Zero Trust, and data loss protection.

The flexible, modular service is supported by NEC's highly skilled and accredited network and security specialist teams and is underpinned by our ITIL-aligned and robust service management capabilities.

Benefits

- ✔ **Enhanced security** - Zero trust protection from endpoint to application whether hosted on cloud or on-premises. We'll protect your data and prevent threats 24x7, providing you with improved visibility, overall security awareness and reduce risk.
- ✔ **Cost effective** - Consolidate into a single platform to dramatically reduce costs and IT resources. Our composable service model combined with flexible pricing model ensures you only pay for what you need.
- ✔ **Improved performance** - Support your increasingly mobile workforce by ensuring they can easily access applications, the internet and corporate data, regardless of location.
- ✔ **Leverage expertise** - NEC can provide an end-to-end service, from design, implementation, upgrade and on-going management. We have deep and long-standing partnerships with leading vendors such as Aruba, Cisco and Fortinet.

Designed with you in mind

NEC will work with you to understand your immediate and potential future requirements to propose a solution that is best suited to achieve your desired business outcomes.

In addition to our Essential service, we can offer complete flexibility as a result of our modular approach leveraging service-orientated design principles. We refer this to as “Service Composability.”

SASE Service
